

ADDING TRANSPORTS TO YOUR OPEN FIRE FORCES

TRANSPORT VEHICLES

Transports are useful for getting your troops to where they are needed most. They are armoured to give the passengers some protection while on the way.

During your Movement Step, an infantry or gun team that ends its movement touching a transport team may board it as passengers. A transport team can carry up to three infantry teams or one gun team.

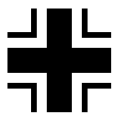

A team starting its movement as Passengers may dismount and move.

If a transport is Destroyed, all of its passengers immediately dismount next to the wreckage.

MOUNTING TRANSPORTS

TRANSPORT VEHICLES

German: Sd Kfz 251.

British: M5 half-track.

USA: M3 half-track.
