

This year Gale Force 9 will be unveiling *Firefly, The Game*, one of the most anticipated releases at the show. Scheduled games and demos will be running throughout the weekend and if you like what you see you can be one of the first people in the US to get your hands on a copy of the game. Every box sold at the show will also include a resin Alliance Cruiser. This high-quality game piece is exclusive to our Gencon customers.

One year on from the release of *Spartacus - A Game of Blood & Treachery*, Gale Force 9's debut board game is still as popular as ever. The stand will have scheduled games for veteran players and demos for the uninitiated. Both the original game and its expansion, *The Serpents and the Wolf*, will be available for purchase at the booth and curious attendees will also get the first glimpse of the Theokeles, Gannicus and Oenomaus models we have lined up.

As usual the local club is hosting a variety of one-day tournaments and gaming throughout the show and we will be on hand to talk all things Flames Of War. Don't let all the Firefly shirts fool you, as the Browncoats are all BF staff and each one of them can talk about pretty much everything we do.

With the release of Wave 8 only a month away the Dust Devils team will be at the stand to show you how to play *DUST Tactics*. The game's creator, Paolo Parente, will also be on hand and has even brought with him a full set of the Wave 8 models to show off. Limited numbers of *Operation Achilles*, the USMC Devil Dogs Squad and the Axis Horten HO-347 will be available at the show as well as the game and all of the releases from wave 6 and 7.
